A diagram illustrating the decomposition of the number 62 into its place values. It features three yellow, furry cartoon characters with horns. The first character is on the left, looking confused with a red question mark above it. Below it is a blue square labeled 'C' and 'centaines'. The second character is in the middle, holding a red '6' in its mouth. Below it is a green square labeled 'D' and 'dizaines' containing the number '7'. The third character is on the right, holding a green '2' in its mouth. Below it is a yellow square labeled 'U' and 'unités' containing the number '2'.

The illustration shows a yellow, fuzzy monster with two striped horns. It has a red question mark above its head, indicating confusion. The monster is holding a red number '6' in its mouth and a green number '1' in its hand. Below the monster are three empty boxes, each with a letter above it: a blue box with 'C', a green box with 'D', and a yellow box with 'U'. Below each box is a label: 'centaines' (in blue), 'dizaines' (in green), and 'unités' (in yellow).

A number place value chart with three columns. A yellow, furry monster with two horns is sitting on the left side of the chart, looking confused with a red question mark above its head. The chart has three columns: 'C' (centaines), 'D' (dizaines), and 'U' (unités). Below each column is a square box. The 'D' box contains the number 8, and the 'U' box contains the number 8. The 'C' box is empty.

A number place value chart for the number 69. It is enclosed in a rounded rectangular frame. On the left, a yellow cartoon monster with a red question mark above it looks confused. In the center, a yellow cartoon monster holds a red '6' and a green '1'. On the right, another yellow cartoon monster holds a red '9' and a green '1'. Below each monster are the letters 'C', 'D', and 'U' respectively, followed by a colored square containing a number. Below each square is the corresponding unit name: 'centaines', 'dizaines', and 'unités'.
